Washington, DC 20554

Dear The Federal Communications Commission,

Dear Mr. Martin,

Re: Fair Share Plan.

I live in a Rual Area. I pay \$35.00 a month just to have a Phone. This doesn't include Long Distance Calls. It's unfair to Consumers to keep footing the Bills. Every time we turn around Costs are sky rocketing. Can't anyone see that throwing Money at Problems dosen't fix anything.

Someone has to find the Problem/Problems and find a way to fix them without raising Costs.

Raising Costs is like a Dog chasing it's tail. When you raise your Fees, the Money has to come from someplace. The Companies won't eat these fees, so there passed along to the Consumer.

This is true with anything. I don't believe in making Big Business pay either. If it wern't for them we wouldn't have Jobs.

There has to be another way to solve the Problems. If you look at it like your Budgeting for your own Home & Family, I think you'll see other options.

Thank You for your Time and good Luck with your new position.

P.S. if you need help, I'll be happy to come in to tighten the Belt and clean House.

Sincerely,

Samantha Tompkins 10421 Thompson Way Valley Springs, CA. 95252
